

AT DEACON ENGINEERS WE UNDERSTAND THE IMPORTANCE OF PRACTICAL ENGINEERING

“The integration of new technologies combined with our many years of experience enables us to deliver specialist, pragmatic and innovative solutions that meet our client's requirements.”

We undertake a broad range of projects and have had the pleasure of working with companies in:

- Mining
- Water & Waste Water
- Industrial
- Recycling & Sustainability
- Mineral Processing

Our senior engineers have decades of experience in heavy engineering design and manufacturing as a foundation to providing our clients with high quality, sustainable engineering solutions. We pride ourselves in offering many services including:

- Mechanical and Structural Design and Verification
- Electrical and Control Design
- Finite Element Analysis, Fatigue and Fracture Analysis
- Computational Fluid Dynamics
- Strain Gauging , 3D Laser scanning and Data acquisition

Expertise:

Our experience in these areas enhances our ability to develop, analyse and optimise designs for all our Client's projects. Our diverse experience in equipment design, manufacturing and the structured application of design and analysis tools ensures that we excel in the delivery of safe, fit-for-purpose and sustainable solutions in meeting our client's challenges

Values:

At Deacon Engineers we embrace our value statement which defines what our company is and what we will continue to strive for in our business, our dealings with our clients and in the development of our staff. We believe that by maintaining these values we create long term benefits for our shareholders, customers, employees, suppliers, and the communities we serve.

Locations:

Deacon Engineers operates out of two offices with one in Perth Western Australia as well as a second office in Shepparton Victoria. With offices on both the Western and Eastern seaboard Deacon Engineers can provide a comprehensive service to its valued clients, Australia wide.
